REVIDON / TRANSPORT

Customer carbon report

Client A / 1–31 October 2026 / Illustrative sample

Delivered shipment emissions

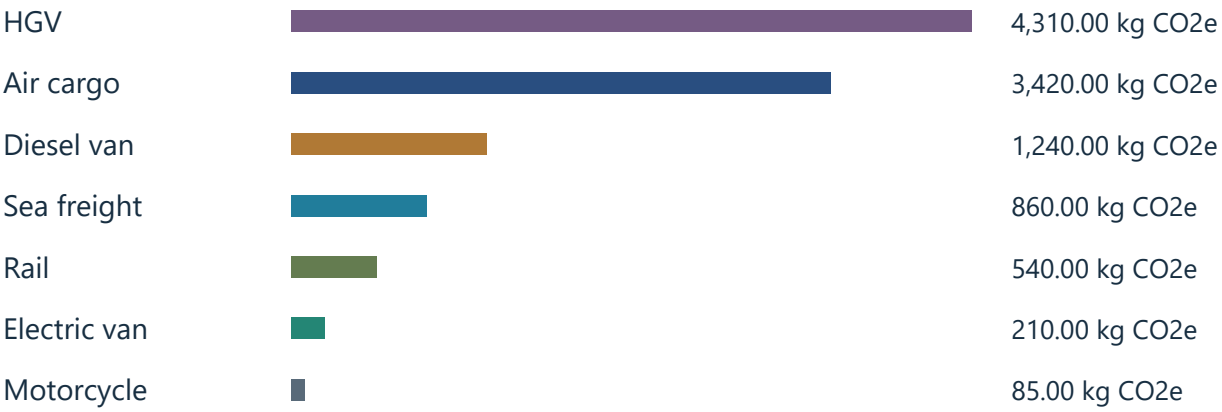
10,665.00 kg CO2e

1,180 delivered shipments with completed calculations, out of 1,284 selected.

74 awaiting delivery account for another estimated 620.00 kg CO2e, held separately.

30 shipments await a calculation and are excluded from the delivered total.

Delivered emissions by transport mode



Booking 1048 / Included once in the delivered total

The depot revised the weight from 6 kg to 8 kg. For the 200 km HGV leg, 0.008 tonnes × 200 km × 0.10 kg CO2e per tonne-km = 0.16 kg CO2e.

The revised estimate replaces 0.12 kg CO2e. The factor is illustrative.

Coverage

These estimates cover the selected transport legs for Client A. They use shipment weight, route distance and mode. CO2e means carbon dioxide equivalent.
